
Operator Training

System Operation

General Information

Course Number: 2-100
Format: Instructor Led
Length: 2 - 3 hours
Maximum Students: 8

Audience

This course is for personnel who operate the material handling system and anyone requiring an understanding of system functionality.

Customer Equipment Requirements

- Dedicated training room with a projector and a white board with markers.
- Access to on-site Dematic equipment.

Prerequisites

- None

Benefits

Participants in this course will learn to safely operate the material handling system. Participants will also learn about product flow and how performance in one area affects operations in another.

Course Objectives

Upon completion of this course, the student should be able to:

- Safely start, stop, and operate the system.
- Identify operational issues that affect system uptime.
- Explain emergency shutdown procedures.
- Properly induct loads into the system ensuring correct product flow.

Topics

1. General

- a. Safety
- b. System Overview
- c. Subsystems
- d. Product Flow through the System
- e. Flow Control

2. System Operation

- a. Control Cabinet Interface
- b. Control Component Operation
- c. Lights, Beacons, and Horns
- d. Starting and Stopping the System
- e. Proper Load Orientation
- f. Jam Reset

3. Emergency Shutdown and Recovery

- a. Pushbuttons
- b. Pull Cords
