

Operation and Maintenance Training

Dematic Multishuttle Operation and Maintenance

General Information

Course Number: 2-115
Format: Instructor Led
Length: 4 days
Maximum Students: 8

Audience

This course is for technicians who operate and maintain the Dematic Multishuttle (DMS).

Customer Equipment Requirements

- Dedicated training room with a projector and a white board with markers.
- Access to on-site Dematic equipment.

Prerequisites

- A general knowledge of mechanical and electrical systems and drawing sets.
- A general knowledge of safety and lockout/tagout procedures.
- A basic knowledge of mechanical and electrical test and repair equipment.

Benefits

Participants in this course will learn to safely perform mechanical, electrical, and controls maintenance procedures. Knowledge gained on common system anomalies can be used to increase system uptime.

Course Objectives

Upon completion of this course, the student should be able to:

- Use the HMI to diagnose common DMS performance issues.
- Identify operational issues affecting system uptime.
- Identify information and components in the DMS mechanical and electrical drawings.
- Explain the function of the DMS mechanical, electrical, and controls components.

- Safely perform mechanical, electrical, and controls maintenance procedures on the DMS.

Topics

1. General

- a. Safety
- b. System Overview
- c. Drawing Sets Reading and Numbering
- d. System Documentation Access and Contents
- e. Identification of Replacement Parts
- f. Communication Protocols

2. Operation

- a. Start Up and Shut Down
- b. HMI Overview
- c. Modes
- d. Diagnostics
- e. Mission Correction
- f. Fault Recovery

3. Component Maintenance

- a. Conveyor
- b. Lifts
- c. Shuttles
- d. Rack
